

ABOUT US

Our company offers structural design and application techniques under the brand of ARGES Design & Build, using advanced technology with its 25 years of experience and capital in the construction industry.

Understanding, view of the project; to create a difference with a different perspective in the service suitable for the customer structure by combining the quality, time and cost triangle with the optimum value. This concept aims to be the first and only in Turkey and in the world, and Design & Build & Keep alive with a collective effort.

As Design & Construction, our display of this concept manifests itself in behavior such as practices related to projects in the construction industry. In Turkey with principles and basic lines.

Our vision

To be one of the leading companies in Turkey's sector by creating jobs by using the latest technology, respectful to the environment in infrastructure and superstructure issues at home and abroad.

Our mission

An exemplary institution that builds at world standards in accordance with advanced construction technologies and makes predictions with its trained team, is a pioneer in quality and business team, is in social life, and pays taxes.
